Cosmetic Waiver and Acknowledgement

The roof coating systems installed by STS approved roofing contractors are designed to waterproof and extend the life of a roof. STS products and systems can alter the appearance of a roof, as STS coatings are field applied and not factory applied. STS coatings, once applied, are exposed to environmental conditions that can also alter the appearance of the roof. Although these factors may and often do alter or affect the cosmetic appearance of a roof, they do not affect the performance or intended purpose of STS products and systems to waterproof and protect so long as the products are installed and maintained in accordance with manufacturer's recommendations.

By signing this Waiver and Acknowledgement, all parties acknowledge that STS roof coating systems may affect the appearance of the roof. Further, all parties acknowledge and understand that STS makes no warranties, either express or implied, regarding the appearance of the roof after application or installation of STS products and hereby waive all claims against STS related thereto.
