

## RGT WARRANTY REQUIREMENTS

The following requirements must be completed for a warranty to be considered and issued on an STS Roof Guardian Technologies Roof System coatings project:

1. Warranty Request Form (RG-WRF) must be completed and returned to STS for review before the project is bid and/or awarded.
2. The appropriate Roof Inspection Report must be completed and returned to STS for review before the project is bid and/or awarded.
3. The Inspection Findings/Comments Form (RG-IFCF) must be returned to STS along with photos for review before the project is bid and/or awarded.  
**Note: Include photos of roof overview and several photos of detail close-up areas. Use the appropriate inspection report items as a guide in providing photos, particularly of problem or potential problem areas.**
4. Check covering any warranty fees if applicable.

STS will review all submitted information promptly. After review, if all information meets warranty criteria, contractor will be notified of approval. Should clarification or additional information be required, contractor will be contacted immediately.

For copies of the appropriate forms and/or reports, contact STS Coatings, Inc. or see attached website link: <http://stscoatings.com/our-products/roof-guardian/warranty-info/>
