

APPLICATION EQUIPMENT AND TOOL RECOMMENDATIONS

The following equipment is recommended by RGT for the preparation and installation of the RGT Roofing System:

- Wire brushes to remove rust
- Metal snips
- Utility knife
- Water source for use in pressure-washing and cleaning
- Electrical power source
- Wrenches for attaching fasteners
- Drill screw gun
- Sawzall with metal blades
- Pressure washer with minimum 3,000 psi equipped with roto-spray tip
- Airless spray system with a minimum 2,000 psi (remove filters) with a .035 TO .045 reversible tip for application of various RGT products
- Caulk guns for application of Flashing Compound
- Thick bristle brushes 2" – 4" to apply various RGT products
- Soft bristle "warehouse" brooms
- Rollers (low-nap) to apply various RGT products
- Polyurethane foam or sponge foam strips to fill excessive gaps in ridge vents, duct work, etc., prior to application of RGT Flashing Compound, Polyester Fabric, or Universal Tape®.
- Pancake head self-drilling, zinc coated stitching screws to secure seams and ridge caps that are not flush to the roof surface
- Heat Gun with pencil tip to make holes for fasteners in Polyester Fabric
