

## **Endorsement**

York Manufacturing endorses the use of STS Coating's GreatSeal PE-150 and GreatSeal LT-100 polyether sealants for use with our Multi-Flash™500 and Flash-Vent™ copper flashings. These sealants are 100% solids with no shrinkage and 0% VOC's making them as compatible with all of the components in a cavity wall as our non-asphaltic flashings. Our Multi-Flash and Flash-Vent copper flashings have become renown for their quality and compatibility and York is thrilled to have found a sealant choice that that lives up to those same standards.
